Maine Developmental Disabilities Council

APR 24

Medication Approaches for Emotional  
and Behavioral Challenges in Autism

Matthew Siegel, MD

Chief of Clinical Enterprise  
Psychiatry & Behavioral Sciences  
Boston Children's

Join the MPBHP ECHO Learning series during Autism Awareness Month. Access a virtual learning network with other providers, including developmental pediatricians, child psychologists, resource coordinators, and parent advocate/educators. Participate in up to 4 sessions consisting of a brief, high-yield didactic presentation and an exploration of real, de-identified complex patient cases to discuss what really works through a local lens.

## What does the Autism ECHO-Burst Offer?

### Increased knowledge about...

- Evaluation process and basic services available to young children.
- Treatment options and community supports for patients and their families.
- Best practices and evidence-based care for successful office visits.
- Primary types of emotional & behavioral challenges in youth with autism.
- Evidence-based medication strategies.

### Subject Matter Experts
